

Amendments to the Specification:

Please amend the current specification as follows:

Please replace the paragraph beginning on page 4, line 15 with the following paragraph:

Figure 5A is a cross-sectional (according to Figure 5A-1) and top view of a rotor and stator in accordance with a particular embodiment showing the support structure for the input, the vanes and chambers between the vanes, and the rotating drive shaft.

Please replace the paragraph beginning on page 5, line 1 with the following paragraph:

Figure 5D is a cross-sectional view (according to Figure 5D-1) of a rotor and stator corresponding to the embodiment shown in Figures 5A, 5B, and 5C showing vanes, drive shaft, and bearings.

Please replace the paragraph beginning on page 5, line 20 with the following paragraph:

Figure 10 is a cross-sectional view (according to Figure 10-1) of a particular embodiment of a liquid ring pump in accordance with the present invention, showing a hermetically sealed motor rotor and magnets that are housed within the pressure and fluid boundary system, the drive shaft, rotor, and rotating housing wherein water droplets are spun off and recycled back to the base water level pump, and a siphon pump for drawing water up into the main chamber of the pump from the lower reservoir.

Please insert the following paragraph on page 8, line 19:

Figure 27B is a magnified view of region E shown in Figure 27A.
